PREFACE.

This work has long been a necessity, owing to the absence of any authority upon the method of mixing the many new popular drinks that have come in vogue. Within the last few years various changes have taken place in the style of preparing different beverages, and the inventive genius of our artistic gentlemen have been employed, and successfully, in discovering something new, delicate and palatable, and improving on the manner of preparing.

As will be noticed, there are many new receipts contained in this book never before published, and for which I am indebted to the kindness of the "Presiding Jupiters" of all our largest establishments.

By careful attention to the rules given, the novice in a short time can become as proficient as his humble servant.

O. H. BYRON.

(Small bar glass.)

1 wine-glass absinthe.

Allow water to slowly drop into the glass until full.

Never use absinthe in any preparation unless ordered by the customer.

American Style of Mixing Absinthe.

(A large bar glass.)

$\frac{1}{4}$ glass of fine ice.

4 or 5 dashes gum syrup.

1 pony absinthe.

2 wine-glasses of water.

Shake the ingredients until the outside of the shaker is covered with ice. Strain into a large bar glass.

French Style of Mixing Absinthe.

(A large bar glass.)

1 pony glass absinthe.

Fill the bowl of your absinthe glass (which has a hole in the center) with fine ice and the balance with water.

Then elevate the bowl and let the contents drip into the glass containing the absinthe, until the color shows a sufficiency.

Pour into a large bar glass. Serve.

Italian Method of Mixing Absintho.

Blue Blazer.

$\frac{1}{2}$ table-spoon sugar, dissolved in a little hot water.
1 wine-glass Scotch whisky.

Set the liquid on fire, and, while blazing, pour 3 or 4 times from one mug into another. This will give the appearance of a stream of liquid fire.

Twist a piece of lemon peel on top with a little grated nutmeg, and serve.

As this preparation requires skill, it is quite requisite that the amateur should practice with cold water at first.

Brandy and Ginger Ale.

When the sugar is dissolved strain the lemonade through a piece of muslin, and, when cool, it will be ready for use.

The lemonade will be much improved by having the white of an egg beaten up with it; a little sherry mixed with it also makes this beverage much nicer.

When cold put it into a bottle and keep it well corked. When required, fill a half-pint tumbler three-parts full of water, and add two table-spoonfuls of the syrup. Then stir in briskly a small teaspoonful of carbonate of soda. The color may be improved by adding a small portion of cochineal to the syrup at the time of boiling.

Add the boiling water to the syrup, and having mixed them let them be added to the jar containing the spirit. If necessary, fine down with alum, etc., as with the others. In making the above a considerable saving may be effected by using oil of cassia; the true cinnamon flavor is, of course, wanting, but is so well represented by that of oil of cassia that none but the most experienced can detect the difference.

Ginger Brandy.

This may be made by following the same directions as given for ginger gin, or the following will be found more economical, though taking a longer time to prepare. Steep half a pound of well bruised Jamaica ginger in one gallon of strong brandy for fourteen days, shaking it up repeatedly. Let this be strained through muslin. Throw the ginger from the muslin into a gallon of boiling water and allow it to simmer over a low fire for twenty minutes and strain. To this add ten pounds of refined sugar.

Bruise half a pound of the best new Jamaica ginger in an iron mortar, and put it into a bottle containing one pint of spirit of wine (60 O. P.), and one pint of water, allow it to macerate for ten or twelve days, shaking it up well each morning. After the twelfth day transfer it to a funnel containing a paper filter ; when all the liquid has run through pass two pints of sherry over it, and lastly, one pint of boiling water. This will yield rather better than half a gallon of liquid. When all are mixed, dissolve in this one ounce of burned sugar, and having added twelve pints of syrup, shake the whole well up, and fine with alum, etc.

 2½ pints spirit of wine (53 O. P.).

 4 pts. rectified spirit (60 O. P.).
 3 oz. tincture of cudbear.
 14 pts. cordial syrup.

CONCENTRATED FRUIT SYRUPS.

The strength of all the following syrups has been calculated solely with a view to the convenience of hotel keepers, etc. We advise each party to prepare them for themselves ; and this can be done with little or no trouble, by making two or three gallons of the simple syrup as a stock, from which a pint or two can be taken at any time, and flavored with any of the fruit essences as required. In summer, one ounce added to a bottle of aerated water or soda water, will produce a glass of orangeade, lemonade, nectar, or other such beverage as may be required, thus obviating the necessity of keeping a stock of each of these in bottle. In winter they may be used instead of sugar for sweetening hot drinks, such as gin, rum, etc., to which they impart the agreeable flavor of fruit whose name they bear. They are also used as a base for the various acidulated summer beverages.

Simple Syrup.

7 lbs. refined sugar.

3 pts. distilled water.

Dissolve the sugar in the water over a gentle fire.

Clove Syrup.

30 drops of quintessence of cloves.

Mix.

Syrup of Nectar.

30 drops essence of nectar.
1 lb. simple syrup.
Mix.

The proportion of 30 parts of sugar to 16 parts of water also makes an excellent syrup.

It is worth adding that it will be found best to employ only the best refined sugar, and filtered water, soft as possible. By so doing it often saves the trouble of clarification, which invariably becomes necessary when inferior ingredients are used.

The best plan is to pour the water cold over the sugar and let it slowly melt; and, when saturated, boil it up to the boil by a gentle heat, and then keep simmering to the point desired.

- 1 drachm essence of bergamot.

Mix altogether, and in one month press and filter. This is greatly improved by age.

Eau D'Absinthe.

- 33 oz. wormwood.
- 24 oz. refined sugar.
- 4 oz. juniper berries.
- $\frac{1}{4}$ oz. angelica root.
- 1 oz. cinnamon bark.
- 4 oz. orange flower water.
- 2 $\frac{1}{2}$ gallons spirit of wine (11 U. P.).

Bruise the sugar, berries, wormwood, etc., in an iron mortar or other convenient utensil and place them in a wide mouthed jar, then add the orange water and spirit. Stir them well up every day for a month, then press and filter.

Eau D'Amis.

- 4 oz. figs.
- 4 oz. raisins.
- 4 oz. dates.
- 1 oz. essence of saffron.
- 6 drops essence of bergamot.
- 10 drops essence of citron.
- 1 1-2 gallons proof spirit.
- 10 lbs. brown sugar.
- 6 pints distilled water.

Beat up the figs, dates, etc., with a part of the sugar until they form a paste ; place this in a wide-mouthed jar, and having previously mixed together the liquids, add a quart at a time, stirring well between each addition ; lastly, add the balance of the sugar, and in one month press and filter.

Eau de Cordiale.

- 20 oz. lemon peel.
- 4 oz. cinnamon bark, bruised.
- 2 oz. balm, the fresh herb.
- 2 oz. powdered coriander seed.
- 2 oz. powdered aniseed.
- 1 oz. powdered mace.
- 1 oz. powdered nutmeg.
- 2½ gallons rectified spirit (60 O. P.).
- 2 gallons distilled water.
- 1 gallon capillaire.

Macerate the solids for ten days in the spirits, and decant as much liquor as can be got off clear. To the mace add the water and capillaire ; stir well up and set aside for fourteen days ; then press, filter and add the liquor first withdrawn. Another method, and we think a better one, is to mix all the ingredients together, and stir them well up every other morning for about a month, and then to press and filter.

Curacao.

- 6 oz. orange peel, cut small.
- 1 drachm cinnamon.
- 1-2 drachm mace, bruised.
- 1 drachm saffron.
- 1 ½ gallons spirit of wine (14 U. P.).
- 2 pints capillaire.

Macerate all together ; in about twenty-one days draw off the liquor through a strainer, and press the residue so as to recover any of the liquor it may have retained ; mix both liquors, and filter through flannel.

BITTERS.

Orange Bitters.

- 1 $\frac{1}{4}$ lb. freshly dried orange peel.
- 1 $\frac{1}{2}$ oz. coriander seeds.

- 1 $\frac{1}{2}$ drachm cardamom seeds.
- 6 pts. rectified spirits (60 O. P.).
- 3 oz. burned sugar.
- 7 pts. syrup.

Water, sufficient to make up two gallons.

Steep the seeds and peel in the spirit for fourteen or twenty days, when it must be drained off and replaced by water ; which after two days drain off and replace by a second quantity of water. Let the three tinctures thus obtained be mixed together, and first the coloring and then the syrup be added. This, if allowed to remain a short time undisturbed, will become bright ; or if wanted for immediate use, may be filtered through fine linen.

Wormwood Bitters.

- 2 drops oil of lemon.
- 2 drops oil of carraway.
- 2 drops of oil absinthe.

- 2 oz. extract of licorice.
- $\frac{1}{2}$ oz. extract of chamomile.
- 3 pints rectified spirit (60 O. P.).
- 3 pints syrup.
- Water, enough to make two gallons.

Dissolve the oils in the spirit, and the extracts in water, add both together at once, shake violently for some minutes ; next add the syrup and the remainder of the water, and again shake well up. Let it stand aside some days, the longer the better, then filter through paper.

Angostura Bitters.

- 4 oz. Angostura bark.
 - 1 oz. chamomile flowers.
 - $\frac{1}{4}$ oz. cardamom seeds.
 - $\frac{1}{4}$ oz. cinnamon bark.
 - 1 oz. orange peel.
 - 1 lb. raisins.
 - $2\frac{1}{2}$ gallons proof spirit.
- Macerate for a month, then press and filter.

Wine Bitters.

- 1 thin peel of lemon.
 - 1 thin peel of bitter orange.
 - 3 oz. good sherry.
 - 2 oz. water.
- Infuse.

Brandy Bitters.

- 4 lbs. gentian root.
- 2 lbs. cardamom seeds.
- 1 lb. cinnamon bark.
- $\frac{1}{4}$ lb. cochineal.
- 2 lbs. chireta.

Bruise all these together to the size of barley corns ; then add two gallons of brandy. Macerate for about a month, then press out all the liquid ; to the residue add one gallon more brandy (some use plain spirit), and after having allowed it to stand one day, press as before ; add the two liquids and filter, when it will be ready for use.

Dutch Bitters.

- 2 oz. wormwood.
 - 1 oz. chamomile flowers.
 - 1 oz. gentian root.
 - 2 oz. orange peel.
 - $\frac{1}{2}$ oz. powdered cloves.

Macerate for a month, then press and filter.

Quinine Bitters.

- 160 grains sulphate of quinine.
- 1 lb. orange peel, cut small.
- 2 gallons cape wine.
- 1 pt. proof spirit.

Dissolve the quinine in the spirit by aid of a gentle heat, and pour it over the orange peel. After it has been allowed to remain undisturbed in a close vessel for two days add the wine, and stir up well every day for a fortnight, then press and filter.

MINERAL WATERS.

In order to make mineral water properly, it is absolutely necessary to possess a powerful aerating and bottling machine, and the water must be, with the carbonic acid gas and chemicals, of the purest quality ; the corks used must also be excellent and especially prepared.

Aerated Chalybeate Water

Contains pro-sulphate of iron, and bicarbonate of potassa. It is a very easy and excellent mode of introducing iron into the blood, and is much recommended on that account, possessing equal tonic properties to that of the natural springs.

Carbonated Lime Water

Is an aerated solution of bicarbonate of lime : the best is made from calcined Carara marble, each bottle containing eight or ten grains of carbonate of lime ; it is administered to strengthen the bony structure.

Lithia Water

Is a solution of the freshly precipitated carbonate of lithia ; this water is becoming popular, being useful in calculous complaints.

Magnesia Water

Is useful in indigestion, etc., being an aerated solution of carbonate of magnesia. It is an agreeable mode of taking magnesia.

Potass Water

Is a solution of bicarbonate of potass in distilled water, and aerated with washed carbonic acid gas.

Soda Water

Is a solution of crystallized carbonate of soda, in distilled water, aerated with washed carbonic acid gas, upon the purity of which the excellence of this article mainly depends. When employed as an anti-acid, it is highly important to obtain this article pure.

Seltzer Water

Is carbonate of soda, common salt, and carbonate of magnesia.

Effervescent Draught.

Carbonate of potass, eighty grains ; pulverized citric acid, seventeen grains. Keep separate. When required for use, add one drop of essence of lemon. Dissolve in separate tumblers, mix and drink while effervescing.

Soda-Water Powders.

Bicarbonate of soda, thirty grains, in a blue paper ; citric acid twenty-four grains, in a white paper. Mix each separately in nearly half a tumbler of water. Pour the acid solution on the soda. Drink immediately.

FRUIT WINES.

Cherry Wine.

35 lbs. ripe cherries. —
5 lbs. brown sugar.
Water, sufficient to make 8 gallons.
1½ pints best French brandy.
Add yeast, and set aside to ferment.

Red Currant Wine.

70 lbs. red currants, bruised and pressed.
10 lbs. brown sugar.
Water, sufficient to fill up a fifteen-gallon cask.
Ferment.
This yields a pleasant red wine, rather tart, but keeps well.

Elderberry Wine.

8 gallons elderberries.
12 gallons water.
60 lbs. brown sugar.
Dissolve, by boiling ; add yeast and ferment ; then add brandy four pounds ; and bung it up for three months. Disagreeable when cold, but if mulled with allspice and drank warm in winter time, it forms a useful stimulant.

Gooseberry Wine.

7 lbs. brown sugar.
40 lb. gooseberries.
Rain water to make ten gallons.
1 quart brandy.
Ferment.

Orange Wine.

23 lbs. sugar.
10 gallons water ; boil.

Clarify with the white of six eggs ; pour the boiling liquid upon the parings of one hundred oranges, add the strained juice of these oranges, and yeast, six ounces ; let it work for three or four days, then strain it into a barrel ; bung it up loosely ; in a month add four pounds of brandy, and in three months it will be fit to drink.

Birch Wine.

In February or March, bore holes in birch trees, and when you have secured 9 gallons juice, boil and skim, cooling it down to 100 degrees Fahrenheit. Dissolve in it 9 pounds sugar, adding two ounces lemon, cut fine ; produce fermentation with 1 pint of gluten. Keep keg full constantly, when the fermenting is over, draw it off and strain, or filter into another keg in which you have burned a piece of brimstone paper.

Blackberry Wine.

$\frac{1}{2}$ ounce ground cinnamon.
 $\frac{1}{2}$ ounce ground cloves.

1 drachm cardamom seeds.

1 drachm grated nutmeg.

5 gallons blackberries.

Mash the berries, pour on 5 gallons water, heat all to a boiling point but do not let it boil.

Add $1\frac{1}{2}$ galls. white syrup; pour all into a 10 gallon keg, keep in a warm place, keep keg full, and after fermenting, strain and press, add one gallon neutral spirits, filter or fine all, and when clear, bottle, and you will have the best.

Black Currant Wine.

5 gallons black currants.

5 gallons water.

10 pounds crushed sugar.

Dissolve sugar in the water. Heat all to 100 degrees Fahrenheit.

Pour into a 10-gallon keg, put in a warm place, keep it constantly full. After fermenting, strain and press; add one gallon spirits, 95 per cent. above proof; fine or filter, and bottle when clear.

Bottling Wines.

Never bottle on a cloudy day; wines never look as transparent as when bottled on a clear day. Never add water to wine that is too strong, unless it has been boiled.

Ginger Wine.

3 gallons water.

3 pounds sugar.

4 ounces Jamaica ginger.

Boil one hour. Strain. Add 3 lemons chopped fine, and half a pint of yeast.

Mix together and pour into a keg. After it has fermented 1 week, draw it; it is ready for use.

Grape Wine.

Pick over carefully, thoroughly ripe grapes, free from stems and blemishes, press out the juice; to one quart of juice add one quart of water, (soft, boiled water is best,) add $1\frac{1}{2}$ pounds sugar. After it is done fermenting, bung up tight. It will be ready to draw off in 3 months or sooner, but will be a far better wine in a year, if left unmolested until then.

Parsnip Wine.

18 pounds of sweet parsnips.

3 gallons of water.

Boil together soft, press liquor through a sieve, add to each gill 3 pounds loaf sugar; when nearly cold add yeast. Let the wine stand open ten days, stirring from the bottom, several times each day.

Then put it in a cask, and keep it full up to the bung with liquor reserved for that purpose, as it works out.

Rhubarb Wine.

Chop the Rhubarb plant, drain off the juice, and to each quart, add a quart of water and 2 pounds of sugar. Let it ferment, and bottle when clear.

Tomato Wine.

One quart tomato juice.

One pound sugar.

Use no yeast, as it will ferment without it. This wine is much thought of in some places, and is easy to make.

To Clean a Wine barrel.

It is necessary, in preparing a new barrel for wine, to scald it in salt water, and afterwards to soak it in two cold waters, after which heat a little wine or pure spirits and rinse out the barrel.

When a wine cask is emptied, always drain it thoroughly, burn a brimstone match, throw it in the cask, and bung it immediately.

A wine cask should be raised from the cellar floor about 6 inches; the temperature be kept at about 55 or 60 degrees, the cellar clean and protected from currents of air.

FRUIT BRANDIES.

Cherry Brandy.

Bruise 3 lbs. of black cherries, wild ones preferable, cracking the stones ; put the mass into a jar, with a few young cherry leaves.

Add 3 pints of brandy or pure spirit ; in three months strain off. Add 2 lbs. of clear sugar, after which it will be ready for use in a week.

Carraway Brandy.

Steep 1 oz. of carraway seed, bruised, in 1 pint of brandy. In one week strain. Add 6 ounces of loaf sugar.

Currant Brandy.

Take 1 quart of black or red currants, and fill up with 1 quart of brandy. In two months strain, and add sugar to taste.

Color with caramel.

Domestic Brandy, No. 2.

- 100 drops oil of Cognac.
 ½ pint alcohol.
 3 drachms powdered orris root.
 1 “ cut vanilla.

Allow the whole to remain together about 24 hours, after which add 1 gallon pure spirits, 20 per cent. above proof ; filter through a felt filter, and add 9 gallons more pure proof spirits, ½ gallon water, 1 pint white syrup.

Color caramel or burned sugar.

Grunewald Brandy.

- 1 lb. orange peel.
 1 “ centaurium.
 4 oz. wormwood.
 4 “ ground ginger.

Steep the thin peels of 6 lemons and 2 bitter almonds in 1 quart of brandy ; macerate 2 weeks, adding ½ pint of water, and 1 lb. of loaf sugar.

Orange Brandy.

Into a large jar put 8 Seville oranges ; cover them with brandy. In three months' time strain off the brandy, sweeten to taste, and cover the oranges over with syrup ; the residuum will make an excellent sweetmeat.

Cassis.

Infuse for 1 week in 1 quart of brandy $\frac{1}{4}$ oz. of cinnamon and 2 cloves, bruised ; then add 1 pint of black currants. Let these macerate for 2 months. Strain with pressure. Add $\frac{1}{2}$ pound of sugar to every pint. Bottle for use.

Very little of the cider sold in cities is pure apple juice. As recipes for artificial cider are advertised and sold at pretty high prices we presume they are wanted. We therefore, append some recipes which will produce at small cost a palatable and innocent imitation of genuine cider, the supply of which is probably too small for the demand in most sections.

Sweet Cider.

100 gallons water.
5 gallons honey.
3 oz. Catechu, powdered.
5 oz. alum.
2 pts. yeast.

Ferment for fifteen days in a warm place (in the sun if possible); add, then, bitter almonds half a pound; cloves half a pound; burned sugar, two pints; whisky, three gallons. If acid should be in excess, correct by adding honey or sugar. If too sweet, add sulphuric acid to suit the taste. We should prefer to add cider vinegar for acidulating, when necessary.

Cheap Made Cider.

1 hogshead good cider.

1 hogshead water.

50 lbs. molasses.

$\frac{1}{2}$ lb. alum, dissolved.

Brimstone matches to stop fermentation, by burning.

Imitation Cider.

25 gallons water.

Sulphuric acid, enough to make the water pleasantly sour.

50 lbs. brown sugar.

4 oz. alum.

5 oz. ginger.

5 oz. cloves.

6 oz. bitter almonds.

Boil the four last ingredients in two gallons of the water for two hours, strain, and add this decoction to the other water. Burned sugar may be added to color, if wished. From three to four gallons of whisky, if mixed with it, will give more body.

It is generally known, we suppose, that bisulphite of lime may be advantageously employed in fresh cider to stop its conversion to vinegar.

"EXCELSIOR"
Series * of * Recitations
—AND—
READINGS.

The great demand for NEW readings, suitable for Recitations, and the frequent and earnest solicitations of our patrons, are the inducements that led to the idea of getting up a new series under the management of a gentleman who has made the wants of the people in this line a study for years, and understands the character of Recitations and Readings needed.

Some persons may think that books of a similar character have been sufficiently multiplied, but in answer to this it may with propriety be remarked, that the best evidence that such publications are needed is the steady increase of applications for books of this class.

Each and every number of "Excelsior" Series will contain about 176 pages, bound in a beautiful illustrated cover, printed in colors, and sold at the remarkably low price of 25 cents each. Nos. 1, 2, and 3 are now ready.

For sale by all Booksellers, or will be sent, postpaid, on receipt of price.
